Complex neurological and trauma packages

SPECIALIST SERVICES:

Intensive rehab packages can be offered over a number of Hobbs sites depending on the clients' needs. As a result, Hobbs are able to improve clients' functional ability and independence which enables them to work towards reaching their rehab potential. This will help reduce their care needs and hence their long term care costs and we will facilitate return to work where appropriate.

Intensive rehab centres: (click on the images to visit the website)

Abbotswood Court, Romsey, Hampshire SO51 0BL

Level 1: residential care with intensive tailor-made rehab with a minimum of 22 hours therapy spread over 7 days (or 5 days if weekend leave is appropriate).

Level 2: residential care with intensive tailor made rehab with a minimum of 12 hours spread over 7 days a week (or 5 days if weekend leave is appropriate).

Oaksey House, Lambourn, Berkshire RG17 8XS

Bespoke intensive rehabilitation packages are offered Monday to Friday. This site provides an excellent transition from hospital to community based rehabilitation.

Clients are accommodated in fully accessible independent living flats with carer or family rooms available upstairs. Facilities also include a well-equipped gym and hydro pool (early 2018). Strength & conditioning and massage are incorporated into the package as appropriate.

The service is particularly suited to spinal cord injury and acquired brain injury, focusing on the return to independent living and work.

Hobbs South West, Evercreech, Jn, Somerset BA4 6NA

Here clients are able to rent a fully accessible 2 bedroom flat and stay with their carers or family. We are able to offer tailor-made intensive rehab packages for both adults and children including hands-on therapy and aquatic therapy in our hydro pool. We also can offer trials with the ReWalk here.

Enham, nr Andover, Hampshire.

Independent living apartments with private access where clients can stay with carers in the adjacent flat.

Tailor-made intensive rehabilitation packages are offered Monday to Friday. Enham provides an excellent transition from hospital helping adapt to living in a community setting with ongoing rehabilitation input. There are social and vocational rehabilitation opportunities including IT training, Radio Enham and more.
