

PRESS RELEASE
JULY 2016

Somerset
benefits from
new Children's
Services and
brand new
premises at
**Hobbs South
West.**

Specialist
rehabilitation can now
be provided for adults
and children with a
wide range of
neurological and
complex conditions.

Tuesday 19th July sees the
official opening where the
team will provide tours of
the brand new 2-bedroom
flat and hydrotherapy
pool, plus showcase the
ground-breaking [Ekso
Bionics exoskeleton](#) and
[AlterG Bionic Leg](#). The
launch will be at 4pm until
7pm.

Physiotherapy,
Occupational Therapy,
Speech & Language
Therapy and Aquatic
Therapy are some of the
treatments available at
the centre which has a
large gym and private
treatment rooms.

Conditions treated
include Cerebral Palsy,
Acquired Brain Injuries,
Spinal Cord Injuries,
Multiple Sclerosis, Stroke
and Parkinson's Disease, as
well as musculo-skeletal
and orthopaedic
conditions.

**The centre now also
provides a purpose-built
fully adapted wheelchair
accessible flat for intensive
inpatient rehabilitation.**

The centre first opened in
2009 with the help of a local
man David Million who, at
45, suffered a stroke which
left him paralysed down his
right side. His rehabilitation
work with Hobbs, combined
with the lack of facilities
locally, led him to join forces
with them and the business
has expanded to provide
superb local resources for
adults and children.

Founded by **Nicky Ellis** and
**Helen Hobbs, HOBBS
REHABILITATION**
offers a full multi-disciplinary
'one stop shop' operating from
8 locations across the south of
England, Hobbs Rehabilitation
provides a co-ordinated patient
centred, goal-orientated
service. This makes Hobbs the
ideal provider for complex care
cases and as a result Case
Managers, Legal and Medical
Professionals find us an efficient
and useful partner.
