

OCCUPATIONAL THERAPY

Our areas of expertise include:

- Assessment and treatment of functional skills involved in everyday living such as personal care, household tasks, hobbies and interests
- Analysis of cognitive abilities such as attention, memory, planning and organisation and development of strategies
- Upper limb rehabilitation including functional electrical stimulation, bespoke splint fabrication, constraint induced movement therapy
- 24 hour postural management including seating assessment, pressure care and manual handling
- Fatigue management
- Identification, trialling and recommending of bespoke equipment, environmental adaptations and assistive technology at home and in the workplace
- Vocational rehabilitation to enable return to work, access to training and education, advice for employers

OCCUPATIONAL THERAPY

“OT helps you identify parts of your life like a jigsaw puzzle, and works with you to piece it back together”

Samantha Harrold

Hobbs Rehabilitation offers specialist neurological occupational therapy for children and adults. Clinicians are experienced in treating neurological conditions such as acquired brain injury, spinal cord injury, stroke, progressive neurological conditions and polytrauma.

Occupational therapists work alongside people affected by neurological conditions to achieve their maximum level of function in everyday activities including work and leisure.

We provide high quality rehabilitation in the home, community, school or workplace and in our treatment centres across the south of England.
