Independent provider of specialist  
**inpatient and outpatient**  
neurological rehabilitation services

# Placing you at the centre of your care

“Hobbs has been a revelation, their expertise in neuro rehab is second to none”

**Camilla Trotter**

**Hobbs Rehabilitation** provides an inter-disciplinary service run by experts in neurological physiotherapy, occupational therapy, speech and language therapy and orthotics, to help ensure that every individual can reach their full potential.

**We treat all neurological conditions including Stroke, Acquired Brain Injuries, Multiple Sclerosis, Parkinson’s Disease and Spinal Cord Injuries.**

Our specialist spinal cord injury unit at Oaksey House (flagship rehabilitation centre of the Injured Jockeys Fund) primarily treats the younger individual with a spinal cord injury combining traditional therapy with the use of technology and gym based exercise.

We can however treat all age groups and all neurological conditions.
