

Do you have difficulty communicating?  
Do you have difficulty swallowing?

## **SPEECH & LANGUAGE THERAPY SERVICES**

Hobbs Rehabilitation offers specialist speech and language therapy **for adults and children** across the south of England. Our therapists have experience working in the fields of stroke rehabilitation, acquired brain injury, progressive neurological conditions and learning difficulties.

Our areas of expertise include:

- Dysphagia (swallowing difficulties)
- Aphasia/Dysphasia (speech difficulties - finding or understanding words)
- Motor speech disorders such as Dyspraxia or Dysarthria
- Facial weakness
- Cognitive communication difficulties
- Voice disorders
- Autism
- Using technology to support communication and therapy, including advice regarding communication aids.

## Speech and Language Therapy Services for adults and children at **HOBBS REHABILITATION**

“We would as a family,  
like to thank you both for all  
your help, encouragement and  
patience. Your teaching aids and  
ideas have made a huge  
difference in our lives”

Stuart & Margaret  
Mitchell & family

Treatment may include

- Exercises to strengthen muscles and improve coordination
- Sensory stimulation, volume and breath control exercises and strategies to make your speech clearer
- Language strategies / practice to help with word finding, fluency, writing, reading and listening
- Helping you to find a safe and acceptable way to manage your swallowing difficulties
- Training family members, friends, carers and teachers on how to support your swallowing and communicate effectively with you.
- Technology: computer-based therapy resources where appropriate to enhance your treatment

**We offer 1:1 and group treatment sessions in a variety of settings including at home, school or at our clinics.**
